## DETAILED ACTION

# Election/Restrictions

Applicant's election of claims 21-32 in the reply filed on 5/24/2010 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

#### Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 21-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 21 recites the structure of the metal salts, but both structures have a -O group, which indicates that t5hese groups are covalently bound to the metal.

Claim 23 recites a structure of the metal salts which have variables not present in claim 21.

The claims are replete with preferred embodiments. It is unclear if applicant intends the claim to only cover the preferred embodiments.

Claims 24-32 recite "any one of claim 21".

The term "the metal compound" in claim 31 lacks antecedent basis.

Application/Control Number: 10/563,237 Page 3

Art Unit: 1621

# Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 21-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 5,998,646 to Riondel et al. (Riondel) or FR 1205366 (FR 366) in view of U.S. Patent No. 2,844,551 to Orthner et al. (Orthner).

Riondel and FR 366 are applied for the proposition that compounds of the structures set forth in claims 21 and 23, shown below, respectively:

$$C_nH_{2n-1}C(=O)O-$$
 and/or  $-OC(=O)CH=CHC(=O)O-(H)$ 

and a metal (M) selected from the group consisting of

A1. Si. Sn. La. Zr. Cu and Zn and mixtures thereof.

Application/Control Number: 10/563,237 Page 4

Art Unit: 1621

### $M(OOCC_nH_{2n-1})_s(R^1)_b$

and can be obtained by reaction of a linear or branched, unsaturated carboxylic acid of the formula

wherein n represents 2, 3, 4, 5, or 6 with the double bond in 2- or 3-position, preferably in 2-position, with a metal compound of the general formula

 $M(R^1)_c$ 

H(R<sup>1</sup>),

and, optionally,

wherein

a is at least 1,

b is 0, 1, 2 or 3 and

(a+b) and c are independently of one another an integer of 2 to  $4_{\mbox{\tiny 3}}$ 

R<sup>1</sup> represents an alcoholate group having a C<sub>1</sub> - to C<sub>6</sub> hydrocarbon residue, wherein R<sup>1</sup> is a saturated, linear or branched alcoholate group, which can be obtained from an alcohol having at least one -OH group, wherein the -OH groups are preferably primary or secondary -OH groups,

or

are known to be prepared by reaction of metal alcoholates and carboxylic acids.

Notwithstanding the fact that the specific metals required by the claims are not taught by Riondel or FR 366, it is for this proposition that the examiner joins Orthner, which specifically teaches the preparation of aluminum salts, as claimed. Accordingly, the use of the recited metals in the process is prima facie obvious.

Application/Control Number: 10/563,237

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl J. Puttlitz whose telephone number is (571) 272-0645. The examiner can normally be reached on Monday to Friday from 9 a.m. to 5 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel Sullivan, can be reached at telephone number (571) 272-0779. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
